

Norton Replaces Track on 2800ST Cam Action Closer

Effective June 30, 2015, Norton Door Controls will replace the current 2800ST Cam Action door closer track with a new low profile track that offers a sleek, modern appearance. In addition to the new look, the non-hold open track comes standard with an internal spring that cushions and protects the door during abusive conditions. Due to the smaller track size, warranty or retrofit applications will require minimal door or frame patching.

Cam action closers provide greater efficiency than rack and pinion door closers for slide track applications. The cam action design provides much lower opening resistance while delivering optimum closing force and control. The efficiency of the 2800ST meets the opening force requirements for ADA while the superior strength and wear resistance make this an ideal choice for hospitals, universities and office buildings.

How to Order:

Specify model number x finish

Pull side mounting: 2800ST x 689

Push side mounting: PS2800STH x 690

Parts List

Model No.	Product Description
